

High School AI Literacy Opportunity Brief

Understand, evaluate and lead with AI

Build understanding, judgment, responsible use and career readiness. Students need to evaluate how AI influences information and decisions as well as learn to use tools.

WHY IT MATTERS

1

Students encounter AI in search, writing, media, career exploration and workplace technologies.

2

Educators need clear practices for accuracy, privacy, bias and academic integrity.

3

Districts balance innovation with equity, transparency and human accountability.

Five competencies for responsible AI literacy

1 Understand Explain what systems do and how they use data or generate outputs.

2 Evaluate Check accuracy, evidence, sources and limitations.

3 Analyze Recognize bias, missing context, unequal impact and potential harm.

4 Protect Safeguard information and practice responsible use.

5 Apply Use human judgment, communicate decisions and remain accountable.

CURRICULUM PATHWAY

The AI Innovators pathway

Introduce selected lessons, integrate with courses, or build a sequence.

1 AI Foundations

Systems, data, predictions and core building blocks.

2 Media Literacy

Accuracy, misinformation, credible sources and generated content.

3 Bias and Fairness

Representation, missing context and unequal outcomes.

4 Digital Citizenship

Privacy, safety, disclosure and academic integrity.

5 Generative AI

Prompting, verification, revision and human-AI collaboration.

6 Career and CTE

Business, technology, media, health science, engineering, transportation, construction, drones and aviation.

7 AI Governance

Transparency, appeals, human oversight and final authority.

CLASSROOM EXAMPLE

Who Is Responsible When AI Makes a Decision?

Students investigate a fictional internship recommendation. The 55-75 minute package includes educator guidance, the student case, ten evidence cards, eight stakeholder perspectives, a decision framework, rubric and exit ticket. The core sequence is 60 minutes.

SCHOOL AND DISTRICT SUPPORT

School and district support

Choose a practical entry point and a focused scope.

Readiness assessment

Identify strengths, gaps, risks and practical starting points.

High school curriculum

Case-based lessons in bias, privacy, media literacy and human oversight.

Educator learning

Practical guidance, modeling and classroom-ready resources.

Pilot implementation

Plan, customize, launch and evaluate focused pilots.

Responsible-use consultation

Support integrity, privacy, equity and implementation safeguards.

Career and CTE integration

Connect AI literacy to authentic problems and workforce pathways.

A practical pilot model

STEP 1

Discover

Readiness assessment and stakeholder input.

STEP 2

Prepare

Educator learning and curriculum customization.

STEP 3

Implement

Student lessons and coaching support.

STEP 4

Evaluate

Student work, educator feedback and recommendations.

NEXT STEP

Plan a school or district partnership

Use the Pilot Planning Handout to record the learning goal, owner, safeguards and review date. Contact Andrea Davis-Baptiste: andrea@maisonglamouretgrace.com
