

COMPANION TO THE SCHOOL LEADERS' AI LITERACY GUIDE

Plan a focused pilot

Start with a learning goal. Use local policies and approvals to set the pace.

School / district

Pilot lead

01 Define the learning and scope

What should students demonstrate?

Name one learning goal and the student work that will show it.

Grade band, group, lesson and proposed dates

Tool or offline approach, access and permitted uses

Use approved tools; include a no-account or offline option where needed.

02 Assign responsibility and safeguards

Decision owner, reviewer and person authorized to pause use

Excluded information and actions

Define data students must not enter and actions the tool must not take.

Accessibility supports, family communication and fallback

BEFORE STARTING Confirm local approval, access supports and a named reviewer.

COMPANION TO THE SCHOOL LEADERS' AI LITERACY GUIDE

Review before expanding

Use evidence and feedback to decide what happens next.

03 Prepare, pilot and learn

DAYS 1-30
assess

DAYS 31-60
prepare

DAYS 61-90
pilot and review

Suggested sequence: days 1-30 assess; 31-60 prepare; 61-90 pilot and review. Adjust timing to local readiness. Completion of this form does not authorize a pilot.

Key preparation steps, owners and target dates

Evidence to collect and the success criteria

Include student reasoning, verification, responsible choices and educator feedback.

How will concerns be reported, corrected and escalated?

Name the contact, pause trigger and fallback if a tool or activity causes concern.

04 Make a documented decision

Review date

Review owner / team

Decision after review:

☐ Revise and review again ☐ Stop the pilot ☐ Expand with approval

Evidence, rationale and conditions for the decision

Next action, responsible person and follow-up date
