

Professional Learning Offerings

Practical learning for responsible AI integration

**Prepare educators.
Make student thinking visible.
Keep people accountable.**

Flexible delivery

60-90 minute introductory or focused sessions; half-day guided practice; full-day learning and planning; multi-session series and coaching. Schools can select individual workshops or request a coordinated seven-session learning pathway.

Choose an entry point

Start with the audience, grade levels, current practices and a concrete learning or implementation goal.

Practice with purpose

Sessions emphasize classroom examples, verification, privacy, equity, accessibility and human judgment.

Customize the scope

Final topics, duration, delivery and pricing are agreed after a discovery conversation. Listed durations are planning options.

PROFESSIONAL LEARNING TOPICS

Core foundations

01 AI Literacy Foundations for Educators

AUDIENCE

Teachers, instructional coaches, specialists, school leaders

DURATION

90 minutes, half day, or full day

FORMAT

In person or virtual

Build a shared understanding of how AI systems work, what generative AI can and cannot do, and what responsible classroom use requires.

Participants will be able to:

- Explain core AI and generative AI concepts in accessible language.
- Identify strengths, limitations, and common misconceptions.
- Recognize when verification and human judgment are required.
- Apply practical responsible-use expectations.

02 Responsible Use of Generative AI

AUDIENCE

Teachers, instructional teams, administrators

DURATION

90 minutes or half day

FORMAT

In person or virtual

Develop clear classroom and school practices for privacy, transparency, disclosure, bias awareness, and human accountability.

Participants will be able to:

- Distinguish appropriate, inappropriate, and high-risk uses.
- Apply privacy and data-protection practices.
- Establish expectations for disclosure and verification.
- Use a human-centered decision framework.

PROFESSIONAL LEARNING TOPICS

Core foundations

03 Evaluating AI-Generated Content

AUDIENCE

Teachers, librarians, media specialists, students

DURATION

60-90 minutes or half day

FORMAT

Workshop or classroom model lesson

Strengthen the ability to evaluate AI-generated claims, sources, images, summaries, and recommendations.

Participants will be able to:

- Check accuracy, evidence, sources, and missing context.
- Recognize hallucinations, weak support, and misleading outputs.
- Use verification routines across subject areas.
- Teach students to explain why information should or should not be trusted.

04 Bias, Fairness, and Human Oversight

AUDIENCE

Educators, leaders, counselors, technology teams

DURATION

90 minutes or half day

FORMAT

Case-based workshop

Examine how data, system design, and missing context can create unequal outcomes in AI-supported decisions.

Participants will be able to:

- Identify potential sources of bias and unequal impact.
- Examine stakeholder perspectives and accountability.
- Design safeguards and appeal processes.
- Determine where human review must remain central.

PROFESSIONAL LEARNING TOPICS

Advanced and role-based learning

05 Privacy, Data, and Digital Citizenship

AUDIENCE

Teachers, students, leaders, technology teams

DURATION

60-90 minutes

Explore personal data, sensitive information, consent, digital footprints, and responsible participation in AI-enabled environments.

Outcomes

- Identify information that should not be entered into AI systems.
- Apply age-appropriate privacy and safety practices.
- Connect AI use to digital citizenship expectations.
- Discuss privacy risks with students and families.

06 Academic Integrity and Assessment in the AI Era

AUDIENCE

Teachers, department chairs, school leaders

DURATION

90 minutes or half day

Redesign expectations and assessments so student thinking remains visible while AI use is addressed clearly and constructively.

Outcomes

- Clarify acceptable and unacceptable AI use.
- Design disclosure and documentation expectations.
- Strengthen process-based and authentic assessment.
- Respond to suspected misuse with consistent guidance.

PROFESSIONAL LEARNING TOPICS

Advanced and role-based learning

07 AI Integration by Subject Area

AUDIENCE

Department teams, instructional coaches, curriculum leaders

DURATION

Half day, full day, or series

Connect AI literacy to existing standards, instructional goals, and authentic tasks in a selected subject or pathway.

Outcomes

- Identify meaningful, low-risk instructional applications.
- Adapt lessons for subject-specific goals.
- Build verification and reflection into student work.
- Create an implementation plan for a department or team.

08 AI Leadership and Readiness for School Teams

AUDIENCE

Principals, district leaders, technology leaders, curriculum leaders

DURATION

Half day or full day

Support leadership teams in assessing readiness, establishing priorities, planning professional learning, and developing responsible implementation pathways.

Outcomes

- Assess current strengths, gaps, and risks.
- Define a shared vision and priority outcomes.
- Identify governance, communication, and capacity needs.
- Select a practical pilot or implementation entry point.

PROFESSIONAL LEARNING TOPICS

Advanced and role-based learning

09 Career and CTE AI Integration

AUDIENCE

CTE educators, pathway leads, counselors, workforce partners

DURATION

Half day, full day, or series

Connect AI literacy to authentic career pathways, professional judgment, industry applications, and workplace expectations.

Outcomes

- Identify relevant AI applications across pathways.
- Teach students to evaluate AI-supported outputs.
- Integrate privacy, safety, and accountability.
- Design career-connected student learning experiences.

10 Train-the-Trainer and Instructional Coaching

AUDIENCE

Instructional coaches, teacher leaders, district facilitators

DURATION

Multi-session series

Prepare internal leaders to facilitate professional learning, model lessons, coach educators, and support sustainable implementation.

Outcomes

- Facilitate core AI literacy sessions.
- Model responsible classroom practices.
- Coach educators through implementation challenges.
- Use feedback and evidence to improve support.

ENGAGEMENT DESIGN

Design an engagement

Connect professional learning to implementation and follow-through.

Single session

A focused introduction or workshop for a defined audience.

Professional learning series

Build knowledge, practice, implementation and reflection over time.

Pilot preparation

Connect educator learning to selected student lessons.

Department or pathway support

Customize learning and planning for a subject, CTE pathway or team.

Leadership readiness

Clarify priorities, readiness, governance, communication and ownership.

Coaching and follow-through

Check-ins, modeling, observation, feedback and adaptation.

CUSTOMIZATION PRINCIPLES

Align to roles, readiness and grade levels; use practical examples; address privacy, equity, accessibility and integrity; connect to district priorities; include planning and reflection.
