

School and District AI Readiness Self-Assessment

Identify strengths, evidence gaps and a practical next step.

WHO SHOULD PARTICIPATE

School and district leaders; curriculum and instruction teams; instructional technology; teacher leaders and coaches; student services, privacy and data leaders.

HOW TO USE IT

Rate all 50 statements. Discuss differences, record evidence and unknowns, choose three priorities, and agree on one next step. Do not guess when evidence is unavailable; mark the item for follow-up.

Rating	Meaning
1 Not Yet	No consistent practice, guidance or ownership.
2 Emerging	Some awareness or isolated practice; inconsistent implementation.
3 Developing	Clear practices underway; incomplete or inconsistent implementation.
4 Established	Documented, supported, monitored and consistently implemented.

READINESS EVIDENCE AND RATINGS

Readiness evidence and ratings

1 NOT YET

2 EMERGING

3 DEVELOPING

4 ESTABLISHED

1 Leadership and Vision

Readiness statement	Rating 1-4
Leaders have a shared definition of responsible AI literacy.	1 2 3 4
AI work is connected to instructional, strategic, or career-readiness priorities.	1 2 3 4
A leader or cross-functional team has clear ownership for AI planning.	1 2 3 4
Leaders communicate that AI should support, not replace, human judgment.	1 2 3 4
The organization has identified a realistic starting point for implementation.	1 2 3 4

Evidence / unknowns

2 Governance and Responsible-Use Guidance

Readiness statement	Rating 1-4
The organization has clear expectations for acceptable and unacceptable AI use.	1 2 3 4
Guidance addresses transparency, disclosure, verification, and academic integrity.	1 2 3 4
High-impact AI-supported decisions require appropriate human review.	1 2 3 4
There is a process for reviewing new AI tools or use cases before adoption.	1 2 3 4
Students, educators, and families can access guidance in understandable language.	1 2 3 4

Evidence / unknowns

READINESS EVIDENCE AND RATINGS

Readiness evidence and ratings

1 NOT YET

2 EMERGING

3 DEVELOPING

4 ESTABLISHED

3 Educator Readiness

Readiness statement	Rating 1-4
Educators understand core AI concepts, strengths, and limitations.	1 2 3 4
Educators know how to protect privacy and avoid entering sensitive information.	1 2 3 4
Educators can evaluate AI-generated content for accuracy and evidence.	1 2 3 4
Professional learning is practical, role-specific, and connected to classroom use.	1 2 3 4
Educators have access to coaching, examples, and implementation support.	1 2 3 4

Evidence / unknowns

4 Student AI Literacy

Readiness statement	Rating 1-4
Students learn how AI systems use data and generate outputs.	1 2 3 4
Students are taught to verify accuracy, evidence, and source credibility.	1 2 3 4
Students examine bias, fairness, missing context, and potential harm.	1 2 3 4
Students understand privacy, disclosure, and responsible-use expectations.	1 2 3 4
Students practice explaining when human judgment and accountability are required.	1 2 3 4

Evidence / unknowns

5 Curriculum Integration

Readiness statement	Rating 1-4
AI literacy learning outcomes are defined by grade band or course context.	1 2 3 4
AI literacy is connected to existing curriculum rather than isolated tool demonstrations.	1 2 3 4
Lessons include critical thinking, reflection, and evidence of student learning.	1 2 3 4
Subject areas and CTE pathways have relevant examples and applications.	1 2 3 4
Curriculum materials are accessible, inclusive, and adaptable.	1 2 3 4

Evidence / unknowns

6 Technology and Approved Tools

Readiness statement	Rating 1-4
The organization knows which AI tools are approved, restricted, or under review.	1 2 3 4
Approved tools meet age, privacy, security, and accessibility requirements.	1 2 3 4
Teachers know which tools may be used with students and under what conditions.	1 2 3 4
Technology support is available for implementation and troubleshooting.	1 2 3 4
Tool selection is driven by learning goals rather than novelty.	1 2 3 4

Evidence / unknowns

READINESS EVIDENCE AND RATINGS

2 EMERGING

3 DEVELOPING

4 ESTABLISHED

7 Privacy and Data Protection

Readiness statement	Rating 1-4
Staff and students know what information should never be entered into AI tools.	1 2 3 4
AI use is reviewed for compliance with student-data privacy requirements.	1 2 3 4
Contracts and tool settings are reviewed for data collection and retention practices.	1 2 3 4
Processes exist for reporting privacy concerns or unintended disclosure.	1 2 3 4
Privacy expectations are reinforced through training and communication.	1 2 3 4

Evidence / unknowns

8 Equity and Accessibility

Readiness statement	Rating 1-4
AI implementation considers differences in access, language, disability, and support needs.	1 2 3 4
Materials and tools are reviewed for accessibility.	1 2 3 4
Leaders examine who may benefit, be excluded, or experience harm.	1 2 3 4
Students have equitable opportunities to develop AI literacy.	1 2 3 4
The organization monitors for bias and unequal outcomes.	1 2 3 4

Evidence / unknowns

READINESS EVIDENCE AND RATINGS

3 DEVELOPING

4 ESTABLISHED

9 Family and Community Communication

Readiness statement	Rating 1-4
Families receive clear information about how AI may be used in teaching and learning.	1 2 3 4
Communication explains benefits, limitations, privacy, and responsible-use expectations.	1 2 3 4
Families have a way to ask questions or raise concerns.	1 2 3 4
Student voice is included in planning and evaluation when appropriate.	1 2 3 4
Community and workforce partners are engaged when relevant.	1 2 3 4

Evidence / unknowns

10 Evaluation and Continuous Improvement

Readiness statement	Rating 1-4
AI initiatives begin with defined outcomes and measures of success.	1 2 3 4
The organization collects student work, educator feedback, and implementation evidence.	1 2 3 4
Leaders review benefits, risks, barriers, and unintended consequences.	1 2 3 4
Pilot findings inform refinement before broader expansion.	1 2 3 4
There is a process for updating guidance as technology and needs change.	1 2 3 4

Evidence / unknowns

SUMMARIZE AND PRIORITIZE

Summarize and prioritize

A score supports discussion; it does not authorize implementation.

Readiness domain	Total 5-20	Priority
1. Leadership and Vision		High / Med / Low
2. Governance and Responsible-Use Guidance		High / Med / Low
3. Educator Readiness		High / Med / Low
4. Student AI Literacy		High / Med / Low
5. Curriculum Integration		High / Med / Low
6. Technology and Approved Tools		High / Med / Low
7. Privacy and Data Protection		High / Med / Low
8. Equity and Accessibility		High / Med / Low
9. Family and Community Communication		High / Med / Low
10. Evaluation and Continuous Improvement		High / Med / Low

INTERPRET TOTALS WITH SUPPORTING EVIDENCE

- 5-8 Beginning
- 9-12 Emerging
- 13-16 Developing
- 17-20 Established

These are descriptive planning bands, not validated benchmarks. A high total cannot cancel an unresolved privacy, safety, access or approval issue.

Which three domains need attention first?

What strength can help, and what risk must be resolved?

What student or educator outcome matters most?

FROM ASSESSMENT TO ACTION

From assessment to action

Choose a focused, realistic and measurable next step.

Priority domain and intended outcome

Action and accountable owner

Timeline and review date

Evidence to collect

Status, barriers and next decision

CONNECT TO THE SCHOOL LEADERS GUIDE

This detailed tool uses ten domains. The deck groups readiness into six broader areas: leadership and vision; curriculum and instruction; educator capacity; policy/privacy/governance; equity and access; measurement and improvement. Use these as a summary, not as a replacement for the detailed statements.

POSSIBLE STARTING POINTS

Leadership readiness session; educator learning; a focused AI literacy pilot; responsible-use guidance review; curriculum mapping; family/community communication. Record scope, safeguards and stop authority in the Pilot Planning Handout.

DISCUSS YOUR RESULTS
