APPLIED PATHWAY | MIDDLE SCHOOL

Drone Career Explorer

Student Workbook & Career Portfolio

Career-connected. Project-based. Future-focused.

Grades 6-8

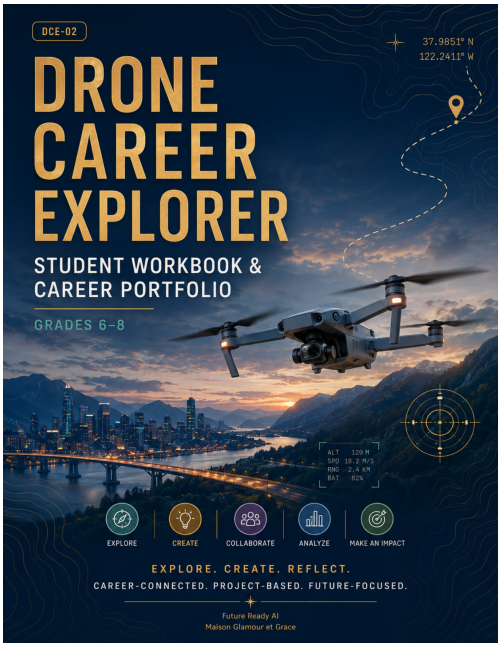

Six-unit career-connected pathway

WHAT THIS PREVIEW SHOWS

- Drone systems and career ecosystems
- Responsible-use decision making
- Sensors, data, AI, and human judgment
- Mission planning and career portfolio development

EVIDENCE OF LEARNING

Portfolio artifacts include a drone ecosystem map, responsible-use guide, sensor-to-decision model, mission brief, industry case, and capstone.

NAME	SCHOOL / PROGRAM	CLASS / GROUP

HOW TO USE THIS WORKBOOK

EXPLORE

Investigate real problems, industries, careers, sensors, data, logistics, and responsible technology.

CREATE

Build maps, decision guides, mission briefs, industry cases, and a final capstone proposal.

REFLECT

Explain your choices, revise your thinking, and collect evidence of your growth.

YOUR PORTFOLIO IS EVIDENCE OVER TIME.
Keep your strongest work, revisions, reflections, and career discoveries. Your final portfolio should show what you understand, how you think, and where you might want to go next.

COURSE PROMISE

The drone is not the career. It is one tool inside a larger ecosystem of people, technology, evidence, responsibility, and opportunity.

CREATE • APPLY • REFLECT

Drone Ecosystem Map

Use this page as your working copy. Your teacher may ask you to revise, present, or add the finished version to your career portfolio.
