APPLIED PATHWAY | HIGH SCHOOL

Drone Career Explorer

High School Student Workbook & Career Portfolio

Career-connected. Evidence-driven. Responsible. Future-focused.

Grades 9-12

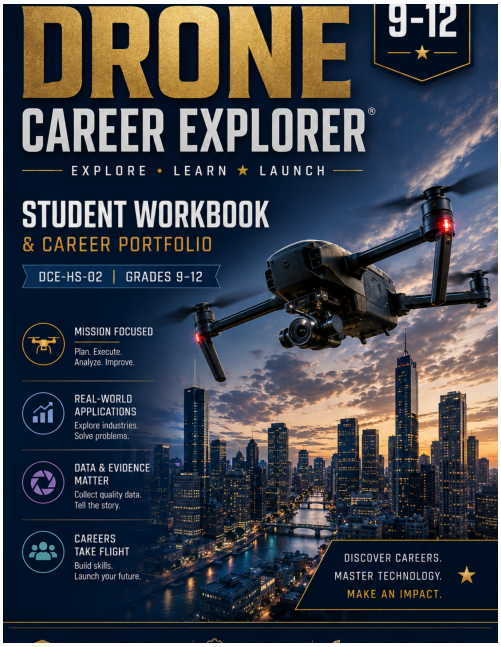

Nine-unit career-connected pathway

WHAT THIS PREVIEW SHOWS

- Professional systems and mission planning
- Responsibility, privacy, risk, and accountability
- AI, autonomy, aerial data, and evidence
- Workforce readiness and capstone defense

EVIDENCE OF LEARNING

Students build systems maps, evidence briefs, decision memos, industry analyses, career-readiness artifacts, and a capstone mission proposal.

SOURCE WORKBOOK

HIGH SCHOOL STUDENT EDITION

MY DRONE CAREER EXPLORER WORKBOOK

Use this workbook to investigate drone-enabled industries, analyze evidence, practice responsible technology decision-making, build career-ready artifacts, and develop a final capstone mission proposal.

STUDENT NAME	SCHOOL / PROGRAM	CLASS / GROUP

HOW TO USE THIS WORKBOOK

1. INVESTIGATE
Question assumptions, examine examples, and collect useful evidence.

2. ANALYZE
Compare options, identify limitations, and explain what the evidence supports.

3. CREATE
Build a professional artifact that shows your reasoning and decisions.

4. REFLECT
Revise, connect your learning to careers, and decide what to improve next.

NO-FLIGHT-READY DESIGN: You can complete the full workbook through case studies, diagrams, data interpretation, research, simulations, teacher demonstrations, and conceptual mission planning. Any physical equipment use is determined and supervised by the school or organization.

YOUR PORTFOLIO GOAL

By the end of the course, you will have a collection of systems maps, evidence briefs, decision memos, industry analyses, career-readiness artifacts, and a capstone proposal that demonstrates how you think—not just what you know.

CREATE • ANALYZE • REFLECT

Responsible-Use Decision Memo

Use this page as your working draft. Your facilitator may ask you to revise, present, digitize, or select the finished version for your career portfolio.

DECISION
